

Product information - Overview

UBS (Irl) ETF plc – Factor MSCI USA Prime Value UCITS ETF (USD) A-dis

ISIN no.: IE00BX7RR706

Category profile

UBS Exchange Traded Funds offer an investment in a broad-based market with just one transaction, the flexibility of security investments combined with a fund investment and transparency thanks to the reference index.

Fund description

- The fund generally invests in US large and mid cap stocks which are contained in the MSCI USA Prime Value index. The relative weightings of the companies correspond to their weightings in the index.
- The investment objective is to replicate the price and return performance of the MSCI USA Prime Value Index net of fees. The stock exchange price may differ from the net asset value.

Benefits

- Clients benefit from the flexibility of an exchange-traded investment.
- Provides access to this segment of the market with a single transaction.
- Optimised risk/return profile thanks to a broad diversification across a range of sectors.
- The fund offers a high degree of transparency and cost efficiency.
- UCITS compliant fund.

Risks

This UBS Exchange Traded Fund invests in equities and may therefore be subject to high fluctuations in value. For this reason, an investment horizon of at least five years and corresponding risk tolerance and capacity are required. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. As a result, the net asset value of the funds assets is directly dependent on the performance of the underlying index. Losses that could be avoided via active management will not be offset.
